Profile

I am a self-motivated, practical problem solver who is eager to learn and undertake new challenges. I am dedicated and passionate about using my technical skills to benefit other people and organizations.

Below you'll find projects I have completed that showcase my skills and general background in developing web applications.

Skills & Compitencies

Languages

HTML/CSS/SCSS

JavaScript/TypeScript

Technologies

React.js

Next.js

Tailwind CSS

Redux

Firebase/Supabase

Node.js

RESTful APIs

Database management (SQL, NoSQL)

GraphQL

Others

Git and version control

Cross-browser compatibility

Responsive web design

Automated testing

Projects

E-Commerce Platform with React and Supabase

Developed a dynamic e-commerce website with a modern tech stack including vite, Redux, React Router, Supabase, and Tailwind CSS.

- Designed and implemented a responsive user interface using Tailwind CSS, resulting in a visually appealing and mobile-friendly website.
- Successfully implemented essential e-commerce features such as product catalog, shopping cart functionality, secure payment integration, and search functionality.
- Integrated Supabase for secure authentication, real-time updates, and streamlined database management.
- Implemented Redux for efficient state management, ensuring a seamless user experience and scalability for future growth.

Real-time weather app □

The app provides up-to-date weather information for any location, allowing users to check the current weather conditions and forecasts easily.

- User-friendly interface to enter a location and get weather information. Showing 7-days weather forcast with visual representations.
- Display current weather conditions (temperature, humidity, wind speed, etc.) with automatic location detection for quick weather updates.
- Integration of a weather API to fetch weather data.
- Wrote automated tests for frontend components.
